

D DIAMOND SO

FROM THE DESK OF THE PRESIDENT

The times we are living in are difficult and unprecedented, to say the very least. At World Diamond Source, we strive to meet these new challenges with optimism and perseverance. The stability that we have developed over the past 28 years is invaluable in a time like this. We are very aware that so many industries functionality can be dependent on the tooling that is sourced from us and we take that responsibility very seriously. We work constantly to maintain inventory and keep rising costs down.

As a family founded, owned and operated Company we are grateful for our vast and long-standing customer loyalty. Our commitment is to get through these tough times without compromising our exceptional level of customer service, maintenance of our tried-and-true product lines and new product development and innovation. World Diamond Source sales teams are expertly trained by industry, and we are always here to assist with product recommendations and technical assistance. We welcome every opportunity to strengthen and BUILD RELATIONSHIPS THAT LAST.

Sincerely,

Clifford J. Maddock

President, World Diamond Source

Meet the North Star of Diamond Tooling Quality and Value

Cliff Maddock PRESIDENT & CEO. WORLD DIAMOND SOURCE

Cliff Maddock has dedicated his entire career to advancing the concrete cutting, grinding, and polishing industry. At age 17, he landed his first job with a diamond blade firm. His only mode of commuting then was a skateboard. While Cliff's form of transportation has changed since then, his business philosophy remains the same: "Building relationships that last." This simple approach has helped World Diamond Source become a successful familyowned and operated business over the last two decades. Instead of taking a "one blade fits all" method, Cliff and his team constantly innovates by engineering diamond tooling for a

specific function and then maintains one of the industry's largest supply for fast customer delivery.

If you cut asphalt, concrete, aggregate, granite, bridge pile, iron pipe, ceramic, porcelain, or other hard material with a diamond saw blade or if you grind and polish concrete, you know the call.

The caller is from a company you've never heard of offering a sweet deal on diamond saw blades. "They're just like the ones from World Diamond Source," or so the well-practiced spiel goes. Veteran diamond blade users know better. It's just another no-name, pop-up company peddling junk blades.

So where does a smart blade buyer go for proven quality, consistency, and savings? There's only one source, *the Source* ... World Diamond Source. Here's what World Diamond Source founder, owner, and president, Clifford (Cliff) Maddock, says to the contractor looking for a reliable diamond blade supplier.

Some say World Diamond Source is like the North Star in today's diamond saw blade market. What do you say to that?

It's a great compliment. We're a familyowned and operated business and we work hard to win the trust and business of our customers. It's no secret the marketplace is swarming with no-name companies offering up "deals" on cheap blades. I don't blame some contractors for falling for the pitch.

When I started the company nearly 20 years ago, I swore we'd stick to a simple game plan: Offer top diamond blades at a fair price and then back it with second-to-none service. A lot has changed in those 20 years. But one thing hasn't for our customers. They depend on us to deliver the best dollar per cut value in the industry, backed with terrific support, before and after the sale.

How do you tell a good diamond blade from a bad one?

Good question. Even I can't tell the difference just by looking. That's why we make it easy and even a little fun by inviting contractors to put our blade to the test entirely at our risk and expense for 30 days. If it kicks you-know-what like I know it will, nine out of 10 contractors will happily pay for it. After all, they've just seen a blade of immense value in action. Like we say, is it better to buy 10 \$100 tools or just three \$250 tools to perform the same job? It's a challenge that's tough to say "no" to.

Why is World Diamond Source seen as an innovation leader?

It's because we move faster than anyone else out there to advance the state of the art. Take vacuum brazed diamond blades. I won't get into the technology here, but it's a powerful way to cut most anything, rebar, bare metal, ductile iron, you name it. We were the frontrunners in carrying it. Now everyone else is tugging at our coattails over it. We're tremendously nimble and we move lightning fast to jump on innovation and then back it with one of the industry's largest inventories of product. No one compares.

What do you recommend for next steps?

Visit our website at WorldDiamondSource. com. You'll find great resources alongwith easy online ordering or a downloadable catalog. Customers like factory-direct pricing backed with outstanding customer service.

BLADE BASICS

A diamond blade is a circular steel disc with a diamond bearing edge. The blade edge comes in three main types: segmented, with individual separate segments for long life; turbo, with continuous serrated edge for aggressive, fast cutting; and continuous rim, for smooth chip-free cutting.

The core of the blade is made of tensioned steel and sometimes has slots. These slots (also called gullets) cool the blade by allowing water or air to flow between the segments. They also allow the core to flex and dissipate stress while cutting, so the blade is less likely to crack.

All blades are designed to run at specific rpms. It's essential for safe operation and optimum performance that blades run at the correct rpm.

> The diamond edge is made of a combination of manufactured diamonds and metal powders. Different mixtures of diamonds and metal powders are used, depending on the aggregate being cut. During the manufacturing process, the metal powder and diamonds are bonded together

at high temperatures to form a solid metal alloy. This metal alloy is then bonded to the blade. A blade's diamond edge is always slightly wider than the core so it doesn't drag or bind in the material being cut.

A diamond blade cuts by grinding through the material. As the diamond edge wears, new and sharper diamonds are exposed.

CHOOSING THE RIGHT BLADE

Answer these simple questions when choosing your blade, or ask your World Diamond Source representative for advice.

- 1 What type of material is being cut?
- **2** Do you want a segmented, turbo or continuous rim blade?
- **3** What is the diameter of the blade?
- 4 Does the rpm of the saw, based on blade diameter, fall within the guidelines?
- **5** Will the blade be used in a wet cutting or dry cutting
- 6 Are you more concerned with the initial price or cost effectiveness of blade?

WET BLADES

Wet diamond blades must be used with a continuous flow of water to maximize performance and prevent excessive heat buildup. Water helps clear dust and cuttings away from the blade and slot being cut. Using a wet blade without adequate water, even for a few seconds, can cause blade damage and pose a safety hazard.

DRY BLADES

Dry diamond blades are designed to be cooled by airflow around the blade. They can be used either dry or wet. Note that every 10 to 15 seconds it's necessary to take pressure off the blade and back it out of the cut, allowing it to run back up to full speed for several seconds. This technique cools the blade, maximizes performance and prevents excessive heat buildup that causes damage.

PRODUCT WARRANTY

World Diamond Source warrants all its products against defects in workmanship and materials for a period of one year from the date of purchase. The responsibility of World Diamond Source under this warranty is limited to replacement or repair of the defective parts, and action will be determined on a case-by-case basis. Under no circumstances will World Diamond Source be liable for consequential or incidental damages arising from misuse or improper operation of any products.

SHIPPING POLICY

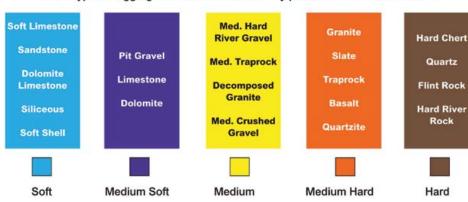

World Diamond Source pre-pays freight on all orders via United Parcel Service or FedEx - Ground within the United States and Canada. Special service requests, such as next-day air or second-day air, is payable by the customer.

AGGREGATE CLASSIFICATION MAP OF THE UNITED STATES

AGGREGATE MAP FOR U.S.A. & CANADA

These are the basic aggregates found in shown areas. Other types of aggregates can be found in many parts of the U.S. and Canada.

HOW DIAMONDS ARE MADE

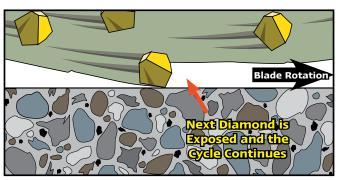

The exposed diamond crystals do the grinding work. The metal matrix or bond holds the diamond in place. Trailing behind each exposed diamond is a bond tail which helps to support the diamond. As the blade rotates through the material, the exposed surface diamonds grind the material.

After several thousand passes through the material, the exposed diamonds begin to crack and fracture. The matrix holding the diamonds also begins to wear away.

Eventually the diamond completely breaks apart and its fragments are swept away with the material it is grinding. When the blade is cooled with water this material, included with water, produces slurry.

As the old diamonds are fractured and worn away they are replaced by new diamonds and the process continues until the segments are worn down to the core.

#1 Rule for Diamond Blades:

Use a Hard Bond to Cut Something Soft and Use a Soft Bond to Cut Something Hard

DIAMOND OUALITY - YOU GET WHAT YOU PAY FOR

LOW QUALITY SYNTHETIC DIAMONDS

- Weaker crystals with irregular shape
- Shorter life & lower cutting rates
- Lower thermal stability
- Does not handle steel & hard aggregates well
- Jagged points that break causing faster wear & lower cutting & drilling performance
- Widely used in low priced dry products

MEDIUM QUALITY SYNTHETIC DIAMONDS

- Good crystal strength & shape
- Good for sawing & drilling applications
- Good cutting speed
- Handles moderate steel & hard aggregate applications

HIGH QUALITY SYNTHETIC DIAMONDS

- Strongest crystals
- · Lasts longer
- Withstands high temperatures
- Octahedral shape for increased tool life & faster cutting
- High impact strength against steel & hard aggregate

Building Relationships That Last:

Why World Diamond Source Offers the Best Value in Diamond Saw Blades

Rising from the humble origins of a small rented office nearly 20 years ago, family-owned and operated **World Diamond Source** (WDS) is now the industry leader for factory-direct diamond saw blades, core bits, concrete polishing tools, and all other types of diamond tooling. Here are 10 reasons why WDS is the contractors'

- **1. Higher Quality = More Value.** Performance-minded contractors always look at the cost per cut from their diamond blade. Buying strictly on dollars alone is a false economy. They know it makes no sense to buy 10 \$100 tools when three \$250 tools can get the same job done at 25 percent savings.
- **2. Factory Direct Pricing.** WDS built its business by offering factory-direct savings, cutting overhead on the industry's most comprehensive selection of blades. No one offers a better combination value, service, trust, and savings as WDS.
- **3. Platinum-Level Customer Service.** Contact WDS and you're in touch with a trusted diamond tooling advisor with the expertise you need to get maximum value from your diamond tooling purchase. What are you cutting? What's the task? Our people take the time to understand your needs, offering you the best values in the market.
- **4. Licensed, Insured Supplier.** Why bet your project safety and performance on a questionable supplier? For nearly 20 years, WDS has reduced the cutting costs of more than 25,000 contractors, from sole proprietors to the industry's largest commercial businesses. "Building relationships that last" is more than a WDS company motto. It's how we earn your business.
- **5. "The Proof Is in the Pudding."** Put a WDS blade on your saw for 30 days at our risk. If the WDS blade kicks butt, all we ask is you pay for the blade. It's our way of proving ourselves in the only test that matters, your jobsite. Who else invites you to try before you buy?
- **6. "OMG" Inventory and Delivery Speed.** Why expose your project to needless downtime? The WDS warehouse is packed with nearly \$4 million in blades and surface preparation tooling.

- **7. Continuous, Relentless R&D.** WDS's research and development program is led by the man that also runs WDS, Cliff Maddock. As a familyowned and operated business, Maddock is able to innovate and respond to industry trends on the fly, providing WDS customers with the latest, highest-performing blade technology across all cutting categories.
- 8. Our Manufacturing Processes. Anyone can copy a WDS blade design. But no one outside of WDS understands the manufacturing process that went into forming that blade. That proprietary process of manufacturing and bonding is a closely-guarded method that differentiates WDS blade performance from poorperforming knock-offs.
- **9. FREE Catalog.** Request your complimentary 116-page copy of the diamond blade cutter's "industry bible." Or view it now online at worlddiamondsource.com. The WDS website is the easy, informative way to order the blades you need.
- 10. Surface Grinding & Polishing Headquarters. If your task is surface preparation requiring metal bond tooling, backing pads, diamond fiber pads, resin polishing pads, resin polishing pads for hand-held and walk-behind machines, and other materials, count on WDS as your one-stop source.

WORLD DIAMOND SOURCES

Advance Your Business with Unmatched Diamond Cutting & Grinding Insight

If there was ever an industry where the hard-won lessons learned by one company can help lift the fortunes of another, it's the diamond saw blade and concrete grinding/polishing tool industry.

The central clearing house for this precious know-how is the industry leader, World Diamond Source, the Floridabased innovator, manufacturer, and factory-direct seller of diamond blades and grinding tools for nearly 20 years.

Each year World Diamond Source works with thousands of concrete contractors worldwide, all seeking the most profitable way to cut or grind concrete on projects of every description, from decorative concrete art to multi-billion dollar infrastructure projects. It's a collection of "what works" knowledge without equal in the industry.

Complimentary access to this insight is available to every World Diamond Source customer. Here are several examples of this powerful value-added benefit in action:

Tool Longevity Transforms Job Profitability

Situation: A major concrete floor finisher agreed to test World Diamond Source

grinding tools to see how they compared with the bargain-basement tools they typically bought. World Diamond Source identified the right grinding tools for the job.

Client Reaction: "Wow! World Diamond Source tools last at least two times longer and we're not done yet. I'm on the second job with the same tools. Normally, we use multiple tool sets on the same job. I can't tell you how good your tools really are, because you'll raise my price! [laughing]"

Outcome: The client now "mics" World Diamond Source grinding tools before each job to micro-gauge percent of tool life left from job to job ("one tool + many jobs = more profit").

Custom Engineered Blades Create Profitable New Business

Situation: A decorative concrete contractor engineered a custom saw for specialty work. The saw requires custom blades not available as an off-the-shelf product. World Diamond Source dispatched a blade designer to personally meet with the Massachusetts contractor and determine blade requirements.

Outcome: Other blade manufacturers recommended the contractor reengineer his saw to conform to inventoried blades. The contractor refused to compromise saw design due to blade requirements. Instead, World Diamond Source created new blades on his specs. The blades now help the contractor "kick butt" and advance his business as never before.

World-Famous Freedom Tower Tile Cut with WDS Blades

Situation: Every porcelain tile in the 2.6 million square foot Freedom Tower (One World Trade Center) was cut by a World Diamond Source diamond blade. With up to 75 porcelain saw cutters working simultaneously, it was imperative the blades reduce cost/cut to breakthrough levels.

Outcome: Ordinarily, it would take approximately three years of R&D to "dial-in" the perfect combination of blade speed and life. The large diamond cutting workforce allowed World Diamond Source to compress the dial-in ETA to just three months. The resulting blade—the popular Zipper™ blade—is the gold standard in porcelain cutting.

Why risk your income, safety, and reputation on junk blades or grinding tools from noname suppliers? For no additional cost, World Diamond Source offers you the same unmatched expertise and factory-direct pricing thousands of professionals worldwide trust every business day.

CONCRETE CONSTRUCTION

Fast Facts about World Diamond Source

Frequently Asked Questions

What is World Diamond Source?

World Diamond Source (WDS) is the world's premier supplier of diamond saw blades, core bits, and concrete polishing and grinding tools for professional contractors.

Why is WDS the premier supplier?

Three big reasons:

- Unmatched Quality. As an industry pioneer and leading diamond tooling innovator, WDS sets the bar on quality and value. WDS maintains exclusive relationships with top overseas factories and is the developer of multiple proprietary manufacturing processes, ensuring no one can match WDS' cost per cut, the true measure of diamond saw blade value.
- Factory-Direct, Low-Overhead Prices. WDS' commitment to superior value is reflected in the company's easy, direct-selling process. Whether online or by phone, WDS makes it easy to order as few or as many blades as you need, with next business day service available.
- 3. Platinum-Level Customer Service. WDS experts are at your service with trusted advice on the best blade for your needs and budget. "Building Relationships That Last" is the WDS motto, and means there is no better way to win your business than by earning it the old fashioned way with outstanding products, value, and service.

Is it easy to do business with WDS?

Absolutely. For details and pictures of nearly 2,500 diamond saw blades, core bits, and concrete polishing and grinding tools, visit WorldDiamondSource.com, where you can order online or download WDS' 116-page catalog (printed version available on request.) WDS offers the industry's most comprehensive selection of diamond saw blades and the friendly, expert team ready to support your project needs.

For More Information

Website WorldDiamondSource.com Phone 800.611.8278

What's the Best Diamond Saw Blade for Your Application?

Matching up just the right diamond saw blade for your application is a careful process at World Diamond Source. For example, WDS carries no fewer than 15 different 14-inch blades. Which one is exactly right for you? Our expert customer support team works with you to meet your project requirements, including fact-finding on:

- Initial price of blade or cost per cut of the blade
- Matching saw and horsepower to blade being used
- Type of material being cut
- Segmented, serrated or continuous rim blade
- Wet-cutting or dry-cutting application

With nearly 2,500 SKU's in stock to choose from, count on your WDS Customer Service Professional to work with you to identify the options of exceptional value.

What Fellow Contractors Say About World Diamond Source

"World Diamond Source has the best quality of product and more knowledge on our needs than anyone we have worked with."

Mason-15 Year Customer Scottsdale, Ariz.

"World Diamond Source is our partner and we would not go anywhere else for diamond blades."

> General Contractor—17 Year Customer Long Island City, N.Y.

"The first time I bought 12-inch and 14-inch blades from World Diamond Source because of price. The second time I bought because of the quality. Now I buy all my blades from World Diamond Source."

Utility Contractor—8 Year Customer Camp Hill, Pa.

SIGNATURE SERIES

SIGNATURE SERIES **EARLY BIRD**

Our Early Bird® Series green concrete blades can be used on all grinders, skill saws, hand held, walk-behind, and early entry saws. We have bonds for all different aggregates when sawing green concrete.

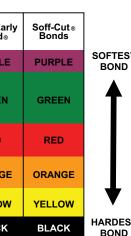

- CUT WITHIN 1 to 2 HOURS The GREEN ZONE™
- Fits all SOFF-CUT® early entry saws without adapters
- Improved METAL Skid Plates For EXTENDED LIFE
- No plastic sleeves **Real Metal Skid Plates**
- Available Sizes: 5"/ 5.5" / 6" / 8" / 10" / 12" / 13.5" / 14"

UNIVERSAL TRIANGLE ARBOR

Blades fit directly on your Soff-Cut® saws, walk behind saws and hand held saws.

 Available in color coded bonds for all aggregates

METAL

Omnivore® is the first diamond blade that cuts raw metal and steel. In fact, the only diamond blade that cuts everything and does it four times faster than a conventional abrasive blade. Omnivore® is so hungry, it even outlasts abrasive wheels at least 30 to 1.

- Cuts steel, cast iron, ductile iron, rebar, concrete, 18-26 gauge roof decking, PVC and wood.
- Eliminates downtime changing abrasive wheels.
- Maintains consistent depths throughout cutting life.
- Available in 4", 41/2", 6", 7", 8", 12", 14" and 16"

TOP TEN REASONS TO USE THE OMNIVORE® VS. ABRASIVE

- This Blade will out last 30 to 50 abrasive wheels to 1
- Cuts faster and cleaner than abrasives
- Can be used wet or dry
- Saves money by reducing costs associated with down time from abrasive blade changes
- The Omnivore® maintains a consistent depth of cut through the entire life of the blade
- Much more environmental friendly than abrasives
- Easily fits on your chop saw, quickie saw, existing radial arm saw grinder and skill saws.
- The Omnivore® blades don't have fibers breaking apart and burning operator
- · Less wear & tear on equipment & operator
- Guarantees lower cutting costs

900 SERIES PCXX: .575" / .490 Usable Segment Height

* 900 Series is same PRO Quality as our 800 Series with a taller segment for even more value on your cost per cut.

UNDERCUT PROTECTION

All WDS walk-behind saw blades have undercut protection for added life and increased safety.

CONCRETE BLADES - Drop Segments and/or Kicker Segment

OVERLAY BLADES - Drop Segments and/or Kicker Segment

ASPHALT BLADES - Undercut Protection On Every Segment!!!

WDS bevel blades are used to cut a bevel angle when cutting joints. Creates a V-Cut. Each blade has a 45 degree angle, leaving a 90 degree bevel in the cut when used in a two blade stacked configuration. These blades are sold as a matched set of 3 blades. A center

line blade, and 2- 45 degree angle blades.

LOOPING BLADES

Our looping blades can be used on all types of hand held and walk-behind saws. Their superior quality makes their cutting speed and life unmatchable. They will exceed your expectations! Readily available in .187", .250", .312", .375" and .500" thicknesses. Other thicknesses are available by special order upon request.

DIAMOND

BEADED WIRE & ACCESSORIES

DIAMOND BEADED WIRE

For use on wire saws for cutting reinforced concrete, masonry stone and metals. Available in two styles for GP cutting or Vacuum Brazed for Heavy Steel. This wire has 11mm Beads and has 40 beads per meter. Sold by the foot.

DIAMOND WIRE

Diamond Wire Impregnated General Purpose Per Foot	GPWIRE
Diamond Wire Vacuum Brazed Heavy Steel Per Foot	VBWIRE

DIAMOND WIRE ACCESSORIES

Diamond Wire Cutters	WCUT
Hydraulic Crimpers For Diamond Wire	HCRIMP
Crimps For Diamond Wire	CRIMPS

DIAMOND WIRE USE & TROUBLESHOOT

GENERAL TIPS AND ADVICE BEFORE STARTING ANY WIRE CUTTING JOB

DRY SAWING

- **1.** Use plated or vacuum brazed wire
- 2. Use very high diamond con beads (above 100)
- 3. Reduce the load on the wire.
- 4. Reduce the rotation speed to 49ft./s
- **5.** If you have a cooling system other than water, use it as it will protect the rubber from melting.
- Try to use a longer wire as it will increase the air cooling time of the wire.
- **7.** Check the uneven wear on the wire and correct the number of pre-twist if necessary.

WIRE TWISTING / CRIMPING

- Lock one end of wire.
- 2. Hold on to the other end and face the wire.
- 3. Twist clockwise (1 Twist / 2ft. of wire length).
- 4. Loop the cable and crimp the connection
- **5.** Rotate the crimp 90 degrees before each crimp. Do not crimp along the same line.
- 6. If wire is broken, before crimping again, it is advised to cut the 3 beads from each end before crimping.
- 7. Assure that THERE IS NO LOOSE WIRE OR RUBBER AT THE SURFACE TO BE CRIMPED.
- 8. Always allow 50% of cable length on each end to be inside the crimped and they are budded tight together.

WIRE CUTTING PROBLEMS / TROUBLESHOOTING

1. FLAT SPOT ON THE BEADS:

- **a.** Not enough pre-twisting Increase twist per ft. of wire if severe flat is forming.
- **b.** Too high load on the wire Reduce the pulling force on the wire.
- **c.** Not enough cooling Increase water flow or reposition water source.

2. HIGH BEAD CONICITY:

- a. Not enough cooling Increase water flow or reposition water source.
- **b.** Too high wire speed Reduce wire speed.
- c. Beads not adapted to the material abrasiveness Change wire specification

3. CRIMP LENGTH CHANGE DURING USE:

- **a.** Too small pulley crimp is being stretched during every turn
- **b.** Too close to the diameter of beads
- c. Too much force
- d. Too soft crimp material

4. WIRE BREAKAGE:

- a. Over load on the wire Reduce the tension of wire
- **b.** Pulley with too small radius. Use a swivel connection
- **c.** Shocks on the connection due to large diameter Move to a smaller diameter crimp
- d. Shocks when starting the cut Break/round the edges before starting

5. HARD TO START - WIRE DOES NOT START AND IS MOVING OR SLIPPING ON THE DRIVE WHEEL:

- a. Reduce tensioning on the wire.
- **b.** Break sharp edges before starting.
- c. Add a pulley in a way to open the angle between the wire and the piece being cut reducing the contact surface with the material.

IMPORTANT TOOLS

- 1. Use Hydraulic crimping Tool kit to assure crimping is consistent and controlled.
- 2. Use extended water nozzle to be able to reach into the cut to flush out the sludge created during cut.
- **3.** Use extra pulleys to break sharp entry to the work piece.

WALL SAW BLADES

890 SERIES

The ICS 890 Series hydraulic cutting system offers the superior strength of FORCE4® technology and is equipped with integrated water delivery system that continuously feeds water to the blade. From the redesigned, more durable rear handle, to the easy to replace drive sprocket, this hydraulic power cutter is engineered to stand up to your toughest jobs. In a package that exceeds industry standards, this sleek powerhouse is packed with features designed to make it work as hard as you do.

WDS PRO - Ductile Iron Chain - 5.5mm / .216 Thick	GCDI
WDS PRO - Chain Link - direct fit hydraulic/gas - soft bond 5.7mm/.224" Thick	DFCLS

SEGMENTS QUALITY

- 1. Unique sandwich segment design maintains segment profile throughout
- 2. The sandwich design has harder outer shell that keeps the segment's profile throughout its life. The use of a soft bond in the center enables fast cutting, especially in heavy steel.
- 3. Allows the segment to work all the way.
- 4. Only top quality diamonds are used in the bond which increases speed and life.

SEGMENT ON EVERY LINK

- 1. Longer life.
- 2. More torque can be placed on chain and bar due to less spacing.
- 3. Gives greater life up to 30% more surface area.
- 4. Chain stretching is reduced because of pressure on each segment is lower.
- 5. Cuts significantly faster when cutting through heavy reinforced concrete. More diamonds in contact with the material.

SDS PLUS BITS

5/32" x 2" x 4-1/4" SDS Plus

DEMOLITION TOOLS AND CARBIDE BITS

SDS PLUS - SDS MAX

- Our bits incorporate revolutionary and dynamic designs that lead to faster speeds, quicker concrete removal, and increased productivity on jobsites.
- The patented design of these bits lead to reduced vibrations, even in the hardest concrete... as well as maximum energy transfer from the drill to the material.
- Special, geometric shape on the carbide tip and flute of these pro grade bits result in an enhanced hole roundness and improved dust release to flute. This also leads to superior dust removal and increased overall speed and production.
- · Larger carbide size in tip leads to higher durability and longer productive bit life.

WDS715

- 1-3/4 square head with 16 steel teeth is ideal for leveling concrete walls or floors
- Pointed tooth design also can be used for roughing a concrete surface to produce a desired finish
- Shot peened for added strength and surface hardness
- Clear coated to further enhance product quality
- SDS-MAX shank

WDS710

Bull Point Chisel

- Solid all purpose tool used for general concrete demolition
- Sharp four sided design on point end assures quick and easy penetration
- Shot peened for added strength and surface hardness
- Clear coated to further enhance product quality
- SDS-MAX shank

WDS711

Bull Point Chisel

- Very popular all purpose tool used for general concrete demolition
- Sharp four sided design on point end assures quick and easy penetration
- 18 in. overall dimension is ideal for applications requiring longer usable length
- Shot peened for added strength and surface hardness
- Clear coated to further enhance product quality
- SDS-MAX shank

WDS712

Flat Chisel

- Solid all purpose tool used for general concrete demolition
- Sharp blade design of chisel end assures quick and easy penetration and enhanced cutting angle
- Shot peened for added strength and surface hardness
- Clear coated for increased product quality
- SDS-MAX shank

WDS714 & WDS714-18

Scaling Chisel

- Quite popular concrete demolition tool utilized mainly for scaling applications
- 3 in. wide blade allows for efficient scaling in a variety of general demolition type work involving concrete, asphalt, and tile
- Shot peened for added strength and surface hardness
- Clear coated to further enhance product quality
- Available 12" and 18"
- SDS-MAX shank

WDS707 Scaling Chisel

Very popular all purpose tool used for general concrete demolition

- 2 in. wide blade increases overall efficiency in all scaling applications
- Sharp blade design of chisel end assures quick and easy penetration and enhanced cutting angle
- Shot peened for added strength and surface hardness
- Clear coated for increased product quality
- SDS-MAX shank

WDS713 & WDS713-24

Flat Chisel

- Very popular all purpose tool used for general concrete demolition
- Sharp blade design of chisel end assures quick and easy penetration and enhanced cutting angle
- WDS713 = 18 in. WDS713-24 = 24in. overall dimension is ideal for applications requiring longer usable length
- Shot peened for added strength and surface hardness
- Clear coated to further enhance product quality
- SDS-MAX shank

SDS-MAX CHIPPING HAMMER W/ CARRY CASE - MHEV 5 BL

PART # 600769620

High breaking performance thanks to maintenance-free brushless motor and high-performance hammer action

Long service life thanks to brushless technology and robust aluminum die-cast housings of gear and motor Metabo Vibra-Tech (MVT) with double dampening: Decoupled handle and impact-absorbing counter-oscillating weight actively reduce vibrations for healthy working also in continuous use.

Ergonomically shaped, slim gripping area with large speed control trigger for comfortable working

Easily accessible locking switch for chiselling in continuous mode

Vario-Tacho-Constamatic (VTC)-Full Wave Electronics for work with materials requiring customized speeds, which remain constant under load optional reduction of the impact energy for working in softer materials

Electronic soft start for smooth start-up

Restart protection: prevents unintentional start-up after power supply interruption

Low-dust chiseling with external dust extraction ESA max (accessories)

Overload protection: protects the motor from overheating The adjustable front handle can be rotated 360°

and the angle adjusted for an optimum working position

• Max. single blow energy (EPTA): 8,7 J

• Maximum impact rate: 2.900 bpm • Rated input power: 1.150 W

· Bit retainer: SDS-max

• Weight (without power cable): 17,4 lbs

· Cable length: 6 m

F-2

SDS MAX HAMMER / ROTATE DUST EXTRACTION KIT W/ CARRY CASE FOR VACUUM

PART # 623271000

- For extraction from the power tool in continuous mode. Especially suited for extracting concrete and rock dust
- For drilling and chiseling with different drill attachments from Ø 16-52 mm, pointed and flat chisels up to 25 mm
- Installation without tools drills and chisels can be exchanged without removing the extraction - External dust extraction
- Compatible with all new Metabo SDS-max hammers in conjunction with all Metabo M and H extraction sets

EQUIPME & ACCESSORIES

ELECTRONIC COMBINATION HAMMER W/ CARRY CASE - KHE D-26

PART # 601109420

Combination hammer with 3 functions: hammer drilling, drilling and chiseling

Spade grip handle for greatest work comfort and maximum productivity when working above the head or facing downwards

Vario (V)-Electronics for working at customized speeds to suit various application materials

High performance hammer action, precisely mounted in a housing made of aluminum alloy: long-lasting and robust

Metabo S-automatic safety clutch: mechanical decoupling of the drive for safe working should the drill stop unexpectedly

Lockable switch for comfortable working in continuous operation

Scaffolding hook for easy and safe temporary storage of the hammer on scaffoldings and ladders

- Max. single blow energy (EPTA): 2,3 J
- Maximum impact rate: 5.400 bpm
- Rated input power: 800 W
- · Drill-Ø concrete with hammer drills: 26 mm
- · Drill-Ø masonry with core bits: 68 mm
- · Drill Ø steel: 13 mm
- Drill-Ø soft wood: 30 mm
- No-load speed: 0 1.150 rpm
- · Revolutions at rated load: 960 rpm
- Bit retainer: SDS-plus
- · Collar diameter: 43 mm
- Weight (without power cable): 2,9 kg

Maximum drilling progress and high breaking performance thanks to maintenance-free brushless motor and high-performance hammer action.

SDS-MAX COMBINATION HAMMER / ROTATE

Combination hammer with 2 functions: hammer drilling and chiseling

Metabo VibraTech (MVT) with double dampening: Decoupled handle and impact-absorbing counter-oscillating weight actively reduce vibrations for healthy working also in continuous use.

Easily accessible locking switch for chiseling in continuous mode

WITH CARRY CASE - KHEV 5-40 BL

PART # 600765620

WDS THE RIPPER® SAW

HYDRAULIC CONCRETE HAND SAW

Standard Features:

- Sturdy all welded aluminum powder coated frame.
- Heavy Duty large dual position front handle for easy control.
- · Water shut-off valve and manifold block positioned to avoid any chance of damage.
- Highly efficient hydraulic motor choice for both strong blade speed and torque delivery.
- All saws include standard 3 foot hose whips including flush face quick disconnects. Hydraulic handsaw motors used vary based on powder pack engine & pump sizes. The motors are matched to your specific power pack needs.
- · Stainless steel blade collar held in place with stainless retainer washer & screw attached to motors center taped shaft.
- Our hydraulic control valve will no longer have o-rings or seal leaks, the new valve has a life-time warranty against leaks.
- · Leading our industry with our new design improvement to our handsaw is the three bolt replicable Rear Splash Guard, no more welding up the holes and cracks to repair. Simply replace.

Hydraulic Hand Saws - Frame Only:

CC6571D LIQUID COOLED WALK BEHIND SAW

Features & Benefits:

- Tier 4 Final liquid-cooled engine allows for a smoother running, longer lasting saw with higher productivity
- Diesel Power Source
- Easy to maneuver self propelled drive
- Strongest frame on the market
- Less rear weight for easy maneuvering and reduced operator fatigue
- · Oil bath blade shaft comes standard
- One-hand sawing control and parking brake
- Fits through a 36" wide door frame (when guard is removed)
- Quick release blade shaft/flange and rear wheels
- Blade shaft tachometer-where it's needed-not at the engine, gives true blade speed

CC4948DCV-3-26 48HP CAT 26" - DIESEL

Features & Benefits:

- Advanced Digital 4" Display Enhanced rich color graphics for superior visibility in bright light. Choose between blade speed, engine speed, and engine torque views with critical diagnosis. Blade overspeed alert that warns of blade RPM exceeding safe limits. Engine service alerts offer maintenance reminders for optimum engine function.
- Adjustable Blade Lowering Speed Dash-mounted for quick, precise adjustment.
- Large 6 Gallon Fuel Tank Convenient left-side filler along with electronic low fuel indication.
- Effective Weight Balance Front-to-rear weight distribution for balanced optimum performance.
- Quick Disconnect Flanges 7" Flanges that quickly detach from stuck blade to minimize downtime.
- Simplified Serviceability Easy, open component access to speed routine maintenance.

CC5049DC-3-36 - 49HP CAT 36" - DIESEL

MADE IN USA

SAWS, EQUIPMENT & ACCESSORIES

14"-42" Blade Capacity - Diesel

- Certified EPA/CARB Tier 4 Engine for clean reliable power with Caterpillar's latest engine technology
- Up to 17-1/2" deep sawing with 42" blade and 7" quick disconnect flanges
- Adjustable blade lowering speed that is dash mounted for quick, precise adjustment
- Single hand sawing control with forward/reverse/raise/lower all in one ergonomic grip
- Three position handle bars set and lock at comfortable, preferred angles
- Large 6 gallon fuel tank with convenient left side filler door along with electronic low fuel level indication
- Quick access rear cover screen for inspecting and service with simple latch convenience
- Heavy duty wheels with durable polyurethane tread on front and thick rubber tread on the rear
- Automatic parking brake with hydraulic activation in stop position gate
- Robust blade shaft offers reliable support from 2 pillow block style, precision ball bearings
- Spline drive PTO gives precision zero side load drive to dampen vibration and shock loads
- Advanced air cleaner with radial seal primary and secondary filters with maintenance indicator
- Sealed electronic protection resists heat, moisture, shock and vibration

Includes: Telescoping front and rear pointers, fuel cooler, low coolant level sensor, oil drain valve, air restriction indicator, travel speed push/pull cable, positive front axle depth stop, slip-on blade flange guard, polycarbonate decals, blade shaft wrench

Blade not included

CC3730E3-3-26 - CC3700E - 30 HP BALDOR 26" - ELECTRIC

SOFT START UPGRADE FOR CC3700E - POWERFUL MULTI-APPLICATION

Features & Benefits:

- Frame designed for higher torque from high horsepower engines
- Forward position motor for more weight at the blade and less on the operator
- Self propelled
- Single or three speed models
- · Front pivot allows easy turning
- · Multi-function control handle

Specifications:

SAWS, EQUIPMENT & ACCESSORIES

CC1507E3-20 - CC1500E - 7HP 460V **3PH BALDOR ELECTRIC**

JACKSHAFT DESIGN, FULL TORQUE

Features & Benefits:

- Electric powered for areas with limited access and where exhaust fumes are not allowed
- · Easy to maneuver push drive
- Motor can be removed in limited access areas to allow for a single person
- · Lightweight aluminum frame
- Screw feed raise and lower
- Heavy duty handle design
- **Specifications:**
- Maximum depth of cut with 14" blade: 4-5/8"
- Maximum depth of cut with 18" blade: 6-1/2"
- Maximum depth of cut with 20" blade: 7-1/2"

• Blade shaft RPM: 2,000

• Blade shaft diameter: 1-1/4"

1" with drive pin · Arbor size: • Blade Raise/Lower: Precision screw feed

 Handle Bars: Adjustable

- Engine adjustment mechanism for belt tightening and maintenance

Specifications:

Max. depth of cut w/ 14" blade: 4-3/8" Max. depth of cut w/ 20" blade: Max. depth of cut w/ 26" blade: Max. depth of cut w/ 30" blade: 12-3/8" 1-3/4" Blade shaft diameter:

CC1820HXL-S - CC1800XL **MEDIUM WALK BEHIND SAW -SELF PROPELLED - 20.3HP 24" GAS**

Features & Benefits:

- Electric start option on Honda and Briggs Vanguard models
- Pull start backup on Briggs Vanguard models
- · Push or self propelled drive
- Easy access to battery with heavy duty isolator switch to prevent battery drain
- Screw feed raise and lower
- · Left or right side sawing
- · Lifting hook standard on all models
- Self aligning blade shaft bearings

CCE0911H-20 - CCE0900 PORTABLE SAW **20" 11.7HP HONDA - GAS**

Features & Benefits:

- 20" blade capacity
- Heavy-duty design but light enough for two people to lift
- Honda GX390 11.7 HP with cyclone air filter
- · Easy to read built-in depth indicator
- Precision dial screw feed raise and lower system
- Water tank and lifting bale included (for dust suppression when dry cutting)
- Adjustable handlebars
- Poly V-belts

· Max. Depth of Cut 7-5/8" • Blade Shaft RPM 2600 Blade Shaft Diameter

 Arbor Size 1" with single drive pin

 Blade Raise/Lower Precision screw feed Sawing Side Right side only

 Weight 275 lbs.

CC1211HXL-18 - CC1200XL **SMALL WALK BEHIND SAW** 18" 11.7 HP HONDA - GAS

- Heavy duty design, but light weight enough for two people to lift and carry
- Cyclone air filter (Honda® models)
- Easy to read built-in depth indicator
- Slip-on blade guard
- · Heavy duty handles do not rattle like competitor handles
- · Left or right hand sawing
- Single ribbed belt
- Water tank and lifting bale (tank optional-for dust suppression)

C16 ELECTRIC FLUSH-OUT HAND HELD SAW

Features & Benefits:

- Wet or dry cutting
- · Overload protection with load warning LED light, visible to operator
- Electrical cord with PRCD protection
- Detachable guide rollers
- Splash guard to protect from water spray
- Handles designed for optimal control
- · Tool-free blade guard angle adjustment
- Lightweight magnesium blade guard
- Externally accessible motor brushes
- Standard water feed system with fine adjustable flow and quick release coupling and durable hose

Specifications:

Power Input: 25A Voltage: 120V RPM: 3900

1" plus Long Year Flush Cut Arbor:

Max. Cutting Depth: Cut Direction: Down

Weight: 17 lbs. (18 lbs. with guide rollers)

SAWS, EQUIPMENT

& ACCESSORIES

M-1 COMPLETE CORE RIGS

Features & Benefits:

- 2-1/2" square column (mast) with black oxidized finish
- 6" wheels for easy mobility
- 4 leveling screws on the base
- Up to 14" bit capacity with one spacer block
- Slide handle allows for drilling in tight areas
- Combination base is a quick change over from vacuum to anchor base
- Dual switch/outlet control panel with amp meter (except for CB700 models with LED amp meter)
- Vacuum pump for quick mounting to flat surface without drilling an anchor hole (included with combination rig)
- Ceiling jack helps keep the rig in place as a backup for anchoring or vacuuming the base down (used with a brace piece-2 x 4 or other material)

M-4 MULTI-PURPOSE CORE RIGS

Features & Benefits:

- Great for the general contractor (basic drilling) or plumber (hand-held drilling), electrical or mechanical contractor
- Reversible slide handle (for use on left or right side)
- High strength, hard anodized 1-5/8" x 2" aluminum column
- · Top carrying handle
- Quick release motor mount

- Carriage lock
- Leveling bolts on all model bases
- · Hand-held option
- Light weight and portable
- Combo bases have angle braces for drilling up to $45^{\circ}\,$
- 4 adjustable slide bearings provide superior carriage rigidity
- Quick change over from vacuum to anchor base

M4C-7-DK12	7 Amp Weka Dk12 (230V)	970/2330/4400	4240053	10169	66

SAWS, EQUIPMENT & ACCESSORIES

WEKA® DK12

Features & Benefits:

- Thermal overload protection switch
- · Side handle for stability
- Water connection for wet coring only
- 5/8"-11 or 1.250"-7 spindle
- Three speed for bits up to 3" (6" mounted)
- · Includes carrying case and wrench
- Two leveling bubbles for accurate coring
- Can be used on M-3 & M-4
- Includes: Plastic molded carrying case, side handle, 1/2" BSP male to 5/8-11 male adapter, wrench

M-2 HEAVY DUTY CORE RIGS

Features & Benefits:

- · Heavy duty rig for larger jobs and the professional driller
- Dual switch/outlet control panel with amp meter (except for CB700 models with LED amp meter)
- 2-7/8" precision made, chrome plated square column (mast)
- Vacuum pump for quick mounting to flat surface without drilling an anchor hole (Included with combination rig)
- Combo base is a quick change over from vacuum to anchor base
- 6" wheels for easy mobility with 4 Leveling Screws on base
- Larger mast to withstand high torque and large diameter bits
 The 4-spoke handle allows the operator to easily apply feed pressure
- Optional roller carriage allows for more precise drilling

M-5 PRO HEAVY DUTY Q.D. CORE RIGS

Features & Benefits:

- Quick disconnect motor mount that makes it easy to remove the motor
- 4-spoke handle (can be used on right or left) on combo rig
- Positive carriage lock and friction lock
- Extruded aluminum light weight column (mast) that has a reinforced track with steel roller guide and rollers
- Dual control panel/amp meter included with combination rigs
- · Quick release vacuum button
- Convenient carrying handle
- Level bubble on column
- 2 gear ratios for easy carriage feed
- Angle stand to drill up to 45°

TYROLIT PREMIUM HIGH SPEED GAS & ELECTRIC SAW WHEELS FOR STEEL-TYPE 1

- Premium aluminum oxide grain
- When increased productivity is required in cutting all ferrous metals, structural steels, rebar and metal decking.
- Good for rail cutting applications
- · Superior cut rate and wheel life

SIZE	Specification	Max RPM	Unit Pkg. Qty.
12" x 1/8" x 1"	A30P/100	5100	10

Type 1 High Speed Gas & Portable Saws

TYROLIT PREMIUM ULTRA-THIN 2-IN-1 WHEELS FOR STEEL & STAINLESS STEEL-NEXT GENERATION -TYPE 1

- Two applications with one wheel; excellent performance in both stainless and carbon steel.
- Significant increase in wheel life and cutting ability
- Short cutting time, extremely free cutting, rough side-surfaces
- Improved first-cut behavior offering free cutting from the start
- Superior wear out behavior with stable cutting ability over entire diameter
- Less noise and vibration
- Perfect exploitation of raw material leaving 30% less cutting dust.
- Forgiving flexibility

SIGNATURE SERIES

PCD ZILLA

- Massive 13mm PCD segment designed to rip and tear through thick materials
- Giant crushed PCD filled rhombus stabilizer segment pulverizes materials below it
- Directional arrows on face of plate
- Highest quality PCD on the market

GODZILLA XL 13MM PCD SEGMENT

Godzilla XL PCD - Left	PCDTRAPXL
Godzilla XL PCD - Right	PCDTRAPXR

MINI-ZILLA PCD

- 2 X 6.5mm PCD's to rip and tear through thinner materials
- Giant crushed PCD filled rhombus stabilizer segment pulverizes materials below it
- Super fast and aggressive
- Highest quality PCD on market

MINI-ZILLA PCD - 2X WITH RHOMBUS CRUSHED PCD

Mini-Zilla PCD - Left	PCGL
Mini-Zilla PCD - Right	PCGR

DEATH TRAP

- 16 and 30 Grit
- Triple Segment design for increased production
- Known as the "Cap Killer"
- Designed for opening up and removing the concrete cap on the hardest concretes
- · Works great for first cut
- 7, 8, 9, on MOHs
- Proprietary bond for ultra hard concrete

GOLD - ULTRA SOFT BOND SEGMENTS

¹⁶ /20 Grit - Ultra Soft	SCC-16/2
³⁰ / ₄₀ Grit - Ultra Soft	SCC-30/4

SUPERNOVA

SIGNATURE SERIES

SPEED TRAP

- Great for leaving tight scratch patterns on initial cuts
- · Removes cure & seal
- Less glazing on hard concrete
- First cut diamonds for polishable overlays
- Works great on light machines
- Ultra fast grinding on ultra hard floors giving super tight scratch patterns
- Fast production / less gumming
- Available in multiple bonds

SPEED TRAP (GRAY)

30 Grit - Ultra Soft	DOTTRAP
60 Grit - Ultra Soft	DOTTRAP60

The SUPERNOVA Signature Series sets the new gold standard for ultra shine.

The thick 12mm pad gives you tremendous life, while our proprietary formula promotes award winning shines and production rates that are second to none.

SUPERNOVA

- Newest bridge between metals and resins
- Proprietary bond for fast cuts and tighter scratches
- Combination of ceramic, copper, and resin up to 200 Grit
- Resin only 400 Grit and up
- Our 400 Grit achieves higher DOI in lower Grits, achieves higher level of shine faster
- Foam cushion between velcro & tool
- 30, 50, 100, 200 Wet / Dry
- 400, 800, 1500, 3000 –
 Comes wet only or dry only

BUSH HAMMERS

World Diamond Source's new bush hammer tools create a bush-hammered profile on concrete, ideal for use on exterior spaces and creating anti-slip surfaces. The WDS Bush Hammer rollers are designed to pulverize the surface of concrete making it fast and easy to get full aggregate exposure. It is also a great option for removing thin coatings when prepping the floor for epoxy application. However, these tools are NOT intended to remove any flexible coatings or most epoxies.

Each bush hammer assembly comes with 2 components - the hammer plate, and a set of 3 rollers with fastening screws (12 Screws and 12 lockwashers - 4 per roller). This 2 component system is packaged and sold separately so that you can purchase the Bush Hammer Roller Assembly separate for multiple uses with the same Hammer Plate.

The WDS Bush Hammer Rollers can be used on Sase*, Husqyarna*, and Diamatic* machines with the use of the WDS Hammer plate system. Bush hammers are not recommended for use with high rpm machines and should be run at no more than 700 rpms.

- Aggressive profiling tool that breaks down the surface that standard diamonds can't touch.
- Removes old glue and resin coatings, particularly thick resins.
- · Provides a good bonding surface or anti-slip finish on concrete, granite, and marble
- Long lasting tool up to 15,000 SF when used properly (Avoid steel and other obstructions in floor to maximize life).
- Two Separate Components to maximize value and get the most life from the reusable Hammer Plate.
- · Bush Hammers come fully greased, and grease should be added before each use being careful not to over grease and blow out the seals.

SURFACE PREPARATION PCD TRAPEZOIDS

PCD TRAPEZOIDS

This new technology, "PCD," is polycrystalline diamond. It is made with very high pressure and temperature. This is a controlled alternative to natural diamond, which has inconsistent qualities. PCD is being used especially for epoxy coating removals.

Mini-Zilla PCD

- 2 x 6.5mm PCD's to rip and tear through thinner materials
- Giant crushed PCD filled rhombus stabilizer segment pulverizes materials below it
- Super fast and aggressive
- · Highest quality PCD on market
- DRY USE for thinner epoxy coatings and glue removal.

lini-Zilla PCD - 2 X PCD's - w / Rhombus Crushed PCD - Left	PCGL
lini-Zilla PCD - 2 X PCD's - w / Rhombus Crushed PCD - Right	PCGR

Godzilla PCD

- Massive 13mm PCD Segment designed to rip and tear through thick materials
- Giant crushed PCD filled rhombus stabilizer segment pulverizes materials below it
- · Directional arrows on face of plate
- Highest quality pcd on market

DRY USE – For extra heavy duty removal of thick coatings.

GODZILLA XL PCD - Left	PCDTRAPX
GODZILLA XL PCD - Right	PCDTRAPXI

PCD TRAPEZOIDS - PCD TOOLING W/ STABILIZER SEGMENTS AND PIN ON BACK PLATE

DOUBLE RHOMBUS XL CRUSHED PCD SEGMENTS DRY USE - for general removal of

epoxy coatings and paint. Double Rhombus XL Crushed PCD Segments

DOUBLE BAR CRUSHED PCD SEGMENTS

DRY USE – for general removal of epoxy coatings and paint.

Double Bar Crushed PCD Segments DSPCG

For general removal of epoxy coatings, paint and glue.

6 X Sharp Edge PCD's - Left PCDS-L

6 X Sharp Edge PCD's - Right PCDS-R

2 X PCD'S - NO STABILIZER BAR

For removal of thick epoxy coatings and urethane paints.

2 X PCD's - No Stabilizer Bar - Left **PCDL** 2 X PCD's - No Stabilizer Bar - Right

PRO SERIES PCD

3 XL Rhombus Crushed PCD Segments 3RSPCD

Mini-Zilla PCD

- 2 x 6.5mm PCD's to rip and tear through thinner materials
- Crushed PCD filled stabilizer rhombus segment
- Super fast and aggressive
- Highest quality PCD on market

2X PCD W/ RHOMBUS CRUSHED PCD **PRO SERIES PCD - THIN COATINGS**

2X PCD - w/ Rhombus Segment - Left 2X PCD - w/ Rhombus Segment - Right

3PCDPL 3PCDPR

Godzilla XL PCD

- Massive 13mm PCD Segment designed to rip and tear through thick materials
- Giant Crushed PCD filled rhombus stabilizer segment pulverizes materials below it
- Directional arrows on face of plate
- · Highest quality PCD on market

2X PCD W/ RHOMBUS CRUSHED PCD PRO SERIES PCD - THICK COATINGS

3" w/ Rhombus Segment - Pin On Back - Left 3" w/ Rhombus Segment - Pin On Back - Right

HOW DIAMONDS ARE MADE

The exposed diamond crystals do the grinding work. The metal matrix or bond holds the diamond in place. Trailing behind each exposed diamond is a bond tail which helps to support the diamond. As the blade rotates through the material, the exposed surface diamonds grind the material

begin to crack and fracture. The matrix holding the diamonds also begins to

Eventually the diamond completely breaks apart and its fragments are swept As the old diamonds are fractured and worn away they are replaced by new away with the material it is grinding. When the blade is cooled with water this material, included with water, produces slurry,

diamonds and the process continues until the segments are worn down to

#1 Rule for Diamond Blades:

Use a Hard Bond to Cut Something Soft and Use a Soft Bond to Cut Something Hard

DIAMOND OUALITY - YOU GET WHAT YOU PAY FOR

LOW QUALITY

- SYNTHETIC DIAMONDS
- · Weaker crystals with irregular shape Shorter life & lower cutting rates
- · Lower thermal stability
- · Does not handle steel & hard
- aggregates well
- · Jagged points that break causing faster wear & lower cutting & drilling performance
- · Widely used in low priced dry products

MEDIUM QUALITY SYNTHETIC DIAMONDS

- · Good crystal strength & shape
- Good for sawing & drilling
- applications
- Good cutting speed Handles moderate steel & hard aggregate applications

HIGH QUALITY SYNTHETIC DIAMONDS

- Strongest crystals
- · Lasts longer
- Withstands high temperatures
- Octahedral shape for increased tool life & faster cutting
- High impact strength against steel & hard aggregate

SURFACE PREPARATION FLOOR POLISHING

FIBER PHENOLIC PADS

Our Fiber Phenolic Pads are perfect for grinding and polishing of cementitious coatings (overlays) and concrete. These extremely flexible pads are also good for working when there are minor dips or low spots when grinding and polishing concrete. These pads are easy to attach on Velcro holders under any style grinding machines. These pads are SUPER-FAST, and outperform pucks up to 3x faster.

- New puck design for optimal grinding results
- New bond formula gives up to 3x Speed performance
- Can grind all types of cementitious floor coverings and concrete floors
- Large surface area for maximum production
- Designed to prevent scratching while polishing concrete
- Available in four sizes: 5" / 7" / 9" / 10" / 11"

SURFACE PREPARATION HAND POLISHING

CERAMIC TRANSITIONAL CUP WHEELS

Ceramic bonded cup wheels for grinding edges during the concrete polishing process. The ceramic give a very fine scratch pattern and provide a superior shine. Eliminates the need to use the metal bonded cup wheels that may leave a deeper scratch pattern and gouge the concrete. These professional grade ceramic cup wheels come in 5" and 7" with a 5/8"-11 thread in 5 grits to match your polishing process.

5" THREADED CERAMIC CUP WHEELS

- · Solid all purpose tool used for general concrete demolition
- · Sharp four sided design on point end assures quick and easy penetration
- Shot peened for added strength and surface hardness
- Clear coated to further enhance product quality
- SDS-MAX shank

WDS711 Bull Point Chisel

- Very popular all purpose tool used for general concrete demolition
- Sharp four sided design on point end assures quick and easy penetration
- 18 in. overall dimension is ideal for applications requiring longer usable length
- Shot peened for added strength and surface hardness
- Clear coated to further enhance product quality
- SDS-MAX shank

WDS712 Flat Chisel

- Solid all purpose tool used for general concrete demolition
- Sharp blade design of chisel end assures quick and easy penetration and enhanced cutting angle
- Shot peened for added strength and surface hardness
- Clear coated for increased product quality
- SDS-MAX shank

WDS714 & WDS714-18 Scaling Chisel

- Quite popular concrete demolition tool utilized mainly for scaling applications
- 3 in. wide blade allows for efficient scaling in a variety of general demolition type work involving concrete, asphalt, and tile
- Shot peened for added strength and surface hardness
- · Clear coated to further enhance product
- Available 12" and 18"
- SDS-MAX shank

WDS707 Scaling Chisel

- Very popular all purpose tool used for general concrete demolition
- 2 in. wide blade increases overall efficiency in all scaling applications
- · Sharp blade design of chisel end assures quick and easy penetration and enhanced cutting angle
- Shot peened for added strength and surface hardness
- · Clear coated for increased product quality
- SDS-MAX shank

WDS713 & WDS713-24 **Flat Chisel**

- Very popular all purpose tool used for general concrete demolition
- Sharp blade design of chisel end assures quick and easy penetration and enhanced cutting angle
- WDS713 = 18 in. WDS713-24 = 24in. overall dimension is ideal for applications requiring longer usable length
- Shot peened for added strength and surface hardness
- Clear coated to further enhance product quality
- SDS-MAX shank

SURFACE PREPARATION WDS CHEMICALS

SURFACE PREPARATION CHEMICALS

WDS SUPER-HARD - PENETRATING LITHIUM DENSIFIER

Super-Hard (SH) is a simple to use Lithium densifier specifically designed for polishing concrete. Used as part of the polishing process, this impregnating densifier enhances the final appearance by producing a much harder surface that allows abrasive tooling to easily achieve a superior polish. Super-Hard (SH) increases clarity and gloss. Abrasion resistance is increased while dusting is reduced. Super-Hard (SH) is an easy one-coat application product with no brooming or rinsing required during application. Application is simple and will not skin, film, discolor, nor leave white blemishes. This lithium-based solution is VOC compliant.

KEY BENEFITS

- · Densifies concrete and terrazzo floors for polishing
- Improves clarity and gloss
- Easy to use one coat application
- Lithium Technology VOC compliant

IISES

Grocery Stores, Parking Garages, Fire Stations, Sidewalks, Driveways, Loading Docks, Aircraft Hangars, Automotive Dealerships, Shipping Terminals, Vehicle Maintenance Areas, Office Buildings, Healthcare Facilities, Cafeterias/Restaurants, Correctional Institutions, Retail & Shopping Centers, Schools, Stadiums, Veterinary Clinics, Common Areas, Laboratories, Lobbies, Mechanical Rooms, Mezzanines, Manufacturing Facilities, Warehouses, Storage, Distribution Centers, Food Processing Plants, Textile Mills, Wastewater Treatment Plants, Pharmaceutical Plants, Electronic Facilities, Cold Storage/ Freezers, Beverage Bottling Plants, Chemical Processing Plants, etc.

Super-Hard - Penetrating Lithium Densifier - 5 gal. (RTU)	WDSSHD-5
Super-Hard - Penetrating Lithium Densifier - 55 gal. (RTU)	WDSHD-55

WDS SUPER-GUARD - PENETRATING LITHIUM STAIN GUARD

Super-Guard (SG) is a surface-impregnating based stain guard designed for interior or exterior concrete, stone, and masonry surfaces. This two component product provides a protective barrier that resists staining and creates an abrasion resistant, easy-to-clean surface. It densifies, seals, and repels while maintaining breathability and doesn't alter the appearance of the substrate. Super-Guard (SG) combines the benefits of Nano-Lithium® silicate densification with silicon reactive chemistry for superior stain protection. This penetrating sealer produces a water repellent, less porous surface to keep out aggressive salts, such as chlorides and sulfates. Super-Guard (SG) may be used at the end of the polishing process in place of traditional film-forming guard products. This treatment is easy to use and is VOC compliant.

KEY BENEFITS

- Guards against stains by creating a protective barrier
 Densifies, hardens, and seals
- For interior & exterior use on concrete, stone, and masonry
- Breathable and non-filming allows moisture to escape
- Lithium technology VOC compliant

USES

Polished Concrete, Parking Garages, Fire Stations, Sidewalks, Driveways, Grocery Stores, Loading Docks, Aircraft Hangars, Automotive Dealerships, Shipping Terminals, Vehicle Maintenance Areas, Office Buildings, Healthcare Facilities, Cafeterias/ Restaurants, Correctional Institutions, Retail & Shopping Centers, Schools, Stadiums, Veterinary Clinics, Common Areas, Laboratories, Lobbies, Mechanical Rooms, Mezzanines, Manufacturing Facilities, Warehouses, Storage, Distribution Centers, Food Processing Plants, Textile Mills, Wastewater Treatment Plants, Pharmaceutical Plants, Electronic Facilities, Cold Storage/Freezers, Beverage Bottling Plants, Chemical Processing Plants, Retaining Walls, Stained Concrete, Steel Troweled, and Cementitious Toppings, Stamped Concrete, Exposed Aggregate, Concrete Block/Cinder Block, Masonry, Pavers, Bricks, Porous Tile, Natural and Engineered Stone, etc.

SURFACE PREPERATION CHEMICALS

WDS SUPER-SHIELD - HIGH GLOSS LITHIUM SEALER

Super-Shield (SS) is a patented, high-gloss, stain and wear resistant finish that improves the shine, hardness and chemical resistance of concrete, natural stone, terrazzo, masonry, and other surfaces. Super-Shield (SS) is lithium water-based, and dries quickly to a clear, extremely hard micro-coating that bonds and reacts with the substrate. Formulated using reactive silicon hybrid polymer technology for rapid shine development and excellent wear properties, this treatment replaces floor waxes and conventional resin based coatings. Because of its unique chemistry, Super-Shield (SS) will not lift or peel from the surface, and periodic recoating requires no stripping. Super-Shield (SS)) is non-toxic, nonhazardous, and VOC compliant in all areas of the world. This treatment can be used in conjunction with a high-speed burnisher to provide superior clarity and improved stain resistance. It will enhance the appearance and extend longevity of polished, integrally colored, dyed, and stained concrete.

KEY BENEFITS

- Provides rapid gloss with maximum stain and abrasion resistance
- Creates and extremely hard and breathable microfilm shield that will not delaminate
- · Reduces maintenance and cleaning costs
- Lithium Technology VOC Compliant

USES

Grocery Stores, Universities, Museums, Churches, Resorts, Fire Stations, Aircraft Hangars, Automotive Dealerships, Shipping Terminals, Vehicle Maintenance Areas, Office Buildings, Healthcare Facilities, Cafeterias/Restaurants, Correctional Institutions, Retail & Shopping Centers, Schools, Stadiums, Veterinary Clinics, Common Areas, Laboratories, Lobbies, Mechanical Rooms, Mezzanines, Manufacturing Facilities, Warehouses, Storage, Distribution Centers, Food Processing Plants, Textile Mills, Wastewater Treatment Plants, Pharmaceutical Plants, Electronic Facilities, Cold Storage/Freezers, Beverage Bottling Plants, Chemical Processing Plants, etc.

SURFACE PREPARATION CHEMICALS

SURFACE PREPARATION CHEMICALS

SUPER-HARD - MONO-SILICATE DENSIFIER CONCENTRATE

SUPER Hard Mono-silicate Densifier improves surface performance and resists the harmful effects of traffic wear and weathering. World Diamond Source SUPER Hard dust proofs, hardens, and cures the targeted surface in order to protect against dusting, pitting, spalling, and efflorescence that can be seen on untreated concrete.

FEATURES

- · Ideal for new construction, existing concrete
- Odorless, non-flammable, non-toxic, VOC Compliant
- Helps reduce efflorescence and alkali silica reaction (ASR)
- · Contains 30% Solids
- Coverage: 400-600 sqft per 1 gallon of mixed product. 1-gal. of concentrate makes 5 gals. of Densifier, 2000-3000 sqft of usable product.
- Penetrates deeply into concrete to densify and harden surfaces to help prevent entry of moisture and other foreign matter.
- · Provides a permanent, attractive sheen with the ability to polish.
- Protects against scratching & peeling provides a protected surface.

SUPER-Hard (1 - Gallon - Concentrate - 4:1)	SHD-1
SUPER-Hard (5 - Gallon - Concentrate - 4:1)	SHD-5

SUPER-Hard (250 - Gallon - Concentrate - 4:1)	SHD-250

Rejuvenating Cleaner 32oz. Bottle (4 oz / 30 Gallons) **RJCON-1**

SUPER-HARD FL - FLORIDA DENSIFIER

SUPER Hard FL is a multi-silicate blend, that is intended for use on extremely porous concrete. It sets up faster than other World Diamond Source densifiers, this keeps the majority of the SUPER Hard FL at the surface of the concrete in order to harden the wearable surface. Its ideal use is on open or porous concrete that will readily accept densifierss. When used in conjunction with World Diamond Source SUPER Shield 2 it is especially effective at resisting stains.

STORAGE

- Store upright in safe dry place at 40-105F° (4 -41C°)
- Keep product from freezing and Keep out of reach of children
- Seal container after use
- Do not mix with other chemicals

DILUTION & COVERAGE

SUPER Hard FL is a Ready to Use (RTU) product and should not be mixed with any other product. SUPER Hard FL has a coverage rate of 400-600 sq ft per gallon depending on porosity of concrete.

SURFACE PREPERATION CHEMICALS

SUPER-SHIELD 1 - PENETRATING RESISTOR

SUPER Shield 2 is a penetrating stain repellent specifically formulated to protect polished, dyed and non-dyed concrete from oil and water-based stains. The water and oil repelling qualities of SUPER Shield 2 provides superior stain protection on most substrates. SUPER Shield 2 can be used as a standalone product but, to obtain optimum performance, World Diamond Source SUPER Shield 2 is recommended for use with World Diamond Source densifiers.

FEATURES

- Non-topical, penetrating sealer
- VOC exempt & non-flammable
- Treated surfaces 'breathe' and do not trap moisture
- Excellent stain repellency for residential, commercial, and even industrial applications
- Extreme hydrophobic and oleophobic characteristics for maximum stain resistance
- · Long-lasting protection with high coverage rate
- Safe for surfaces that experience high traffic
- Few instances of color change (slightly darkens concrete)
- Provides a chance to clean up spills before they stain or etch a surface

USES

• New or existing polished concrete, Exposed concrete flooring

DILUTION & COVERAGE

SUPER Shield 1 is shipped Ready to Use (RTU) and should not be mixed with any other chemical. Approximate coverage rate is 3,000 - 5,000 sqft per gallon.

SSP-1
SSP-5
SSP-55
SSP-250

SUPER-SHIELD 2 – SEMI-PENETRATING PROTECTOR

SUPER Shield 2 is a penetrating stain repellent specifically formulated to protect polished, dyed and non-dyed concrete from oil and water-based stains. The water and oil repelling qualities of SUPER Shield 2 provides superior stain protection on most substrates. SUPER Shield 2 can be used as a standalone product but, to obtain optimum performance, World Diamond Source SUPER Shield 2 is recommended for use with World Diamond Source densifiers.

FEATURES

- Extends stain-resistance
- Increases slip-resistance
- Increases surface hardness
- · Enhances appearance and deepens color
- Improves gloss
- Clear, non-yellowing
- Can be burnished periodically to restore gloss
- Cures for foot traffic in 24 hours
- Simplifies maintenance
- Water-based

USES

New or existing polished concrete, Exposed concrete flooring

DILUTION & COVERAGE

SUPER Shield 2 is shipped Ready to Use (RTU) and should not be mixed with any other chemical. Approximate coverage rate is 3,000 - 5,000 sqft per gallon.

AMERIPOLISH® CHEMICALS

Ameripolish* manufactures high performance architectural concrete products through extensive research and field testing. The Ameripolish product line includes innovative surface prep materials, overlayments, dyes, colorants, and maintenance treatments designed for the professional installer. Ameripolish uses cutting edge technology to prep, strengthen, color, protect and maintain polished concrete floors.

AMERIPOLISH® - Surelock® has recently had its formula updated making it the most vibrant concrete dye Ameripolish® has ever produced. It is a versatile colorant for polished concrete that mixes with water or acetone. SureLock can be used as a stand alone colorant product or can be combined with densifier. When mixed with 3D HS or HSL it penetrates and chemically bonds to the concrete. The pre-dissolved concentrate liquid is fast and very easy to use. The new formula includes UV stabilizers to resist fading

as well as a penetrating agent to eliminate further mixing and develop deep, rich color even on hard, dense concrete.

^{*}DISCLAIMER: THESE ARE ONLY AVERAGES, SO THE COVERAGE RATE CAN VARY DEPENDING ON THE FLOOR, IN ADDITION TO OTHER VARIABLES

THE DC STORM 600

The DC Storm 600 has a three-phase direct driven turbo pump that is suitable for continuous operation and heavy material transport, source extraction and cleaning. Several improvements have incorporated in it:

- A new efficient semi-automatic filter cleaning system.
- For easier transportation it has handles both front and rear and the cyclone can be tilted.
- For better ergonomic the handles are adjustable and the cyclone can be tilted for easier filter exchange.
- The new intellibag plastic bag system for dust free bag change.
- A new more efficient HEPA filter with a larger filter area.

Three basic models are available: bag (C), container (A) and Longopac (L) containers.

Specifications:

Max vacuum, inwg/kPa 132/33 kPa Container 75 I /19 US gal

Filter area fine filter 5 m^2 Filter area HEPA filter 2.7 m^2 Sound level 75 dB(A)

DC STORM 600L vacuum 10hp. 230v takes Longo Pacs **WDS119435**DC STORM 600LPG vacuum 10hp. Propane takes Longo Pacs **WDS119901**

Clean burning propane and the reliability of Dustcontrol® powered 21 HP engine.

Designed for the user with class leading capacity and minimal maintenance requirements, the unit will operate approximately 8 hours on a full tank.

- External self-discharging cyclonic air filter with visual filter monitor.
- Available weight distributing chassis set available for early entry saw application.
- High efficiency, true cyclonic primary dust separation. Relieves filter loading, minimizes down-time and maximizes up-time.
- Effective reverse pulse cleaning on the main filter. Extends filter life.
- H13 HEPA filtration. Filters even the most dangerous respirable particulate and keeps your crew safe.
- Large pneumatic wheels, locking casters and an ergonomic handle.
- Integral chassis fork pockets for ease of loading and movement from place to place.
- Reliable belt drive and automatic mechanical clutch.
- Low maintenance 21HP motor with standard oil cooler and low oil pressure shut down.
- Three way catalytic muffler, O2 sensor, auto shut-down and alarm indication.
- Remote battery charger hook up point and LED battery monitor.
- $2 \times 18 \text{ W}$ LED Work Lamps for when you get into those out of the way places.
- 2 x USB outlets to keep your mobile devices charged.

DC TROMB 400L WITH BAG

The DC Tromb 400 is designed to Supplied with (Part No.) Meet modern safety requirements and work in conjunction with tools that have become ever more efficient and that therefore produce more dust than they have previously. The maximum air flow is as high as 400 m^3/h / 247 cfm which is more than enough capacity for equipment such as floor grinders with a working width of 500 mm /19" and large electric cutoff saws. It is easy to transport around construction sites, move in stairwells and lift into tight spaces. The wheels are puncture-proof and won't leave marks on the floor. The front wheels are lockable to enable working on uneven ground.

Specifications:

H x W x L (cm/inch): 139 x 56 x 70 / 54"x 22"x 27" a/ 50 kg /110 lbs

Weight: c/ 46 kg /101 lbs L/ 48 kg /106 lbs

Power consumption 115/230V: 2100 W Sound level: 70 dB(A)

With a capacity of approximately 1,800 m³/h /1059 cfm the DC AirCube 2000 is the most powerful single-phase air cleaner on the market. The DC AirCube 2000 has a robust, stainless-steel chassis and an encapsulated fan with variable speed setting. With its ergonomic design, it is easy to carry and transport. It can also be operated when positioned horizontally. The DC AirCube 2000 has a HEPA H13 filter with an area totalling 10 m² /107ft². An integrated light indicates when it is time to replace the filter.

DC AIRCUBE 500

The DC AirCube 500 has been developed for ease of use and durability. The fan unit is a radial blower with a specially designed scroll to build up high pressure across its entire flow range. This means that the unit generates a large amount of airflow during the entire lifetime of the filter. Equipped with a power socket for items such as a lamp. An exhaust hose can be used to create negative pressure in a sealed room. The fan has two speed settings, which means that the unit can be run economically, for example during the night.

Specifications:

H x W x D (cm/inch): 38 x 34 x 50 / 15"x 13"x 20" Weight kg/lbs: 13 kg /28,6 lbs Inlet/Outlet: 38 x 34 cm /Ø125 1.5 x 1.3 inch /5"

4 1/2" - GRINDER - SINGLE SPEED WP 1100-125

PART # 603612420

Description:

- Robust, universal and economical: ergonomic angle grinder for any application
- Powerful motor with good overload capacity
- Tool-free adjustable guard; twist-proof
- Paddle switch with dead man function: safe to operate due to an ergonomically integrated switch
- Suitable for 120 Volt direct current (DC)
- Grinding wheel Ø 115 / 125 mm
- Rated input power 1.100 W
- Output power 700 W
- No-load speed 12.000 rpm
- Revolutions at rated load 7.000 rpm
- Torque 2,6 Nm
- Spindle thread 5/8" 11 UNC
- Weight (without power cable) 2,2 kg
- Cable length 2,5 m

PROFESSIONAL POWER TOOL SOLUTIONS

1400 WATT ALL-PURPOSE VACUUM CLEANER ASR 35

PART # 602057800

For extraction from the power tool in continuous mode, both on construction sites and in the workshop. Especially suited for extracting concrete and rock dust.

- Compact vacuum cleaner for liquids and dry solids with commercial registration
- Power socket for a power tool for using the automatical start- up/shut-down of the vacuum cleaner
- AutoCleanPlus: saves both costs and time thanks to automatic
- MPulse filter cleaning during continuous use
- If the optimum suction performance falls below a certain level, the filters are vibrated immediately
- Equipped with HEPA filter, keeps back 99.995% of fine dusts over 0.3 μ
- Automatic shut-down when vacuuming liquids once the maximum fill level is reached
- Suction power control for adapted suction performance
- Automatic trailing mechanism for emptying the suction hose completely
- Antistatic basic equipment prevents static charge when using appropriate accessories
- Sturdy thanks to especially large wheels and castors with wheel stop
- Cable winding mechanism. Practical accessory case and storage area
- Current Control: maximizes the suction power while the machine is connected so that the main fuse is not triggered

Specifications:

Air output max.: 4.380 cfm Vacuum: 248 hPa (mbar) Filter surface: 8.600 cm² Input power max.: 1.400 W Container volume: 35 I Suction hose Ø: 35 mm Hose length: 3.2 m Weight: 16 kg Cable length: 8 m

2X HEPA FILTER CASSETTES FOR ASR35 ACP

PART # 630326000

Includes:

• 1x 2pk Metabo 630326000 HEPA Filter Cassettes for ASR35 ACP

Highlights:

- HEPA = high efficiency particular air filter
- Stops 99.995% of fine dusts over 0,3 μm
- Corresponds to dust class H (HEPA 14)
- Keep your Metabo ASR 35 ACP running at peak performance with these genuine HEPA filter replacements. Sold in a pack of 2.

COLLECTION BAGS (5/PACK) 9/14 GAL, 35/50L

PART # 630325000

Description:

- Plastic Disposal Bags 5-pk
- Polyethylene disposal bags for use with 602057420 (ASR 35 ACP) and US602057800 (ASR 35 ACP HEPA). Plastic disposal bags cannot become blocked with fine dust (quartz dust in particular) like paper filter bags.
- Dimensions L x W x H: 15.5 x 11.5 x 3.5 inches

G-64 WWW.WORLDDIAMONDSOURCE.COM G-65

5" VARIABLE SPEED ANGLE GRINDER - WEV 15-125 HT

PART # 600562420

Description:

Optimum processing of stone: robust, powerful angle grinder with gear reduction and reduced, adjustable speed for material-friendly working. Longer service life, more power: the Metabo Long-life-motor with patented dust protection, up to 20% more overload capacity and 50% more torque.

• Grinding wheel Ø: 125 mm

• Rated input power: 1.550 W

• Output power: 900 W

• No-load speed: 2.800 - 9.600 rpm

Revolutions at rated load: 9.600 rpm

• Torque: 4.2 Nm

• Spindle thread: 5/8" - 11 UNC

• Weight (without power cable): 2.5 kg

· Cable length: 2.5 m

5" CONCRETE GRINDER KIT W/ CARRY CASE & DUST CONTROL SHROUD - RSEV 19-125 RT

PART # 603825750

Description:

For effective spot grinding and removal of concrete, screed and coatings with diamond cup wheels. Maximum productivity thanks to 1,900 Watt strong Metabo Marathon-motor with low weight. High torque and overload capacity for demanding applications in continuous use. Low weight, ideal for sanding walls and ceilings. Working close to edges thanks to integrated folding segment.

Optimum extraction results: spring-mounted brush rim at the protective cover that adapts to any surface and segment height.

Front handle for safe and uniform guidance when polishing, adjustable without tools

Vario Tacho Constamatic (VTC) Full-wave Electronics with Thumbwheel: for working at customized speeds to suit the application material and speeds that remain almost constant, even under load. Electronic soft start for smooth start-up

Metabo S-automatic safety clutch: mechanical decoupling of the drive for safe working should the tool stop unexpectedly

Restart protection: prevents unintentional start-up after power supply interruption

Connection for dust extraction: Ø 35/41 mm

- Grinding wheel: Ø 125 mm
- Torque: 5 Nm
- No-load speed: 3.800 8.200 rpm
- Rated input power: 1.900 W
- Output power: 1.240 W
- Revolutions at rated load: 6.800 rpm
- Spindle thread: 5/8" 11 UNC
- Weight (without power cable) 3.5 kg
- Cable length: 2.5 m

9" ANGLE GRINDER, 2,400 WATT - W 24-230 MVT

PART # 606467420

Description:

Metabo Long-life motor with patented dust protection for long service life. Rotating back handle and side handle can be mounted at 3 positions for optimum handle position also when cutting.

Tool-free adjustable guard; twist-proof

Metabo VibraTech (MVT): integrated damping system and side handle to reduce vibrations in order to protect the user's health. Metabo safety switch prevents unintentional start.

Auto-stop carbon brushes to protect the motor

- Grinding wheel: Ø 230 mm
- No-load speed: 6.600 rpm
- Revolutions at rated load: 4.600 rpm
- Torque: 17 Nm
- Spindle thread: 5/8" 11 UNC
- Weight (without power cable): 5,8 kg
- Cable length: 4 m

Scope of delivery:

Guard, Metabo VibraTech (MVT) side handle

9" ANGLE GRINDER, 2,400 WATT - KIT W/ DUST CONTROL SHROUD - W 24-230 K

PART # 60646780

Description:

Metabo Long-life motor with patented dust protection for long service life. Rotating back handle and side handle can be mounted at 3 positions for optimum handle position also when cutting.

5" HANDHELD SCARIFIER W/ CARRY CASE - RFEV 19-125 RT

PART # 603826760

For effective removal of plaster, adhesive residues, soft screed and old paint from walls, ceilings and floors

Maximum productivity thanks to top 1,900 Watt with low weight

Double reduction high-performance gearing for maximum torque and high output

Fast work progress thanks to large milling diameter

Perfect ergonomics thanks to slim handle for maximum control and easy working overhead

Cutting depth can be adjusted easily and without the need for tools

Robust protective cover made from die-cast aluminium with spring-mounted brush rim for low-dust working

Front handle for safe and uniform guidance when milling, adjustable without tools

Can be used as renovation grinder on smaller areas when using a diamond cup wheel

Vario Tacho Constamatic (VTC) Full-wave Electronics with

Thumb wheel: for working at customized speeds to suit the application material and speeds

that remain almost constant, even under load

SDS MAX HAMMER / ROTATE DUST EXTRACTION KIT W/ CARRY CASE FOR VACUUM

PART # 623271000

- For extraction from the power tool in continuous mode. Especially suited for extracting concrete and rock dust
- For drilling and chiseling with different drill attachments from \emptyset 16-52 mm, pointed and flat chisels up to 25 mm
- Installation without tools drills and chisels can be exchanged without removing the extraction External dust extraction
- Compatible with all new Metabo SDS-max hammers in conjunction with all Metabo M and H extraction sets
- The machine shown may differ in equipment and technical details depending on the configuration Accessories included only if listed in the delivery scope

5" UNIVERSAL DUST SHROUD

PART # NEWSHROUD5

5" Rubber Collar Shroud - (Makita, Hitachi, Dewalt, Milwaukee, Bosch, Metabo)

5" CONVERTIBLE SHROUD

PART # 655153000

- Dustless convertible shroud for concrete surface prep.
- 5" shroud. For all current small angle grinders W 9 / W 12 / W 15 / W 17

PART # 655154000

- Dustless convertible shroud for concrete surface prep.
- 655154000 7" shroud. For all current large angle grinders W 24 / W 26

HOLER DUST SHROUD | GRINDER 175MM ALUMINIUM EDGE

5" Aluminum Shroud - Fits Makita, Hitachi, Bosch
7" Aluminum Shroud - Fits Makita, Hitachi, Bosch
NEWSHROUDALUM7

7" UNIVERSAL DUST SHROUD

PART # NEWSHROUD7

7" Rubber Collar Shroud - (Makita, Hitachi Bosch)

HEX BOLTS FOR HANDLE

PART # 141110390

LOOP HANDLE FOR ALL LARGE GRINDERS

PART # 630342000

GRINDER OFF-SET SPANNER WRENCH

PART # 62391000

10 CUTTING STARS, POINTED HEAD - RFEV 19-125 RT

PART # 628270000

Description:

- For retrofitting with RFEV 19-125 RT cutting head
- With 5 micro-encapsulated screws for secure attachment

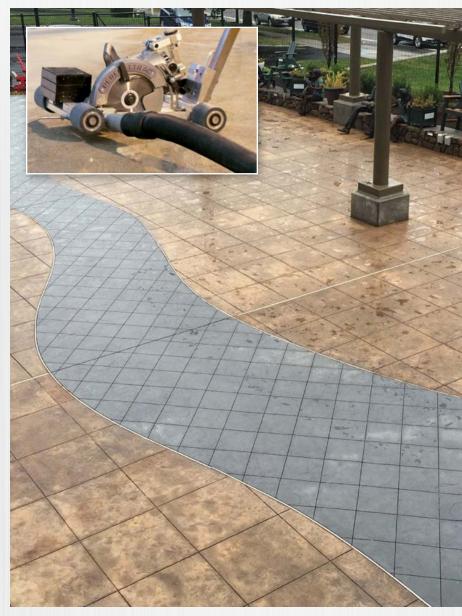

NYLON WEAR STRIPS

5" Nylon Wear Strips	REPLACEMENT5
7" Nylon Wear Strips	REPLACEMENT7

THE PERFECT TRAC SAW is the best tool on the market for the prepping and removal of joint fillers as well as controlled and decorative cuts. Newly redesigned, it has a maximum depth cut of 2¼" using a 7" blade. The Perfect Saw is easy to operate, portable and adjustable so anyone can tackle the job no matter how small or large. You will see cleaner cuts with little to no chipping and by attaching a vacuum you can work dust free. The Perfect Trac Saw runs on 110v / 20amp power supply at a low RPM allowing you to work anywhere and giving both your blades and interchangeable motor a longer life.

EDIA (EVOLUTION OF DIAMOND IMPREGNATION ARRAY)

These days the trend in diamond tools is an application of an automatic array system. An automatic array system changes our stereotype that life time is in inverse proportion to cutting speed. So our company has devised an automatic array system through many years of R & D and millions of dollars invested. We let this system distribute and arrange diamond particle, so that the system has the best efficiency in cutting mechanism.

We named this system "EDIA" (Evolution of Diamond Impregnation Array). The system is already proven through many field tests and guaranteed more than 30% improvement of cutting speed, also the blade life can be extended by more than 50%.

LW 1503 - 253.089

Compact 5" WET Polisher with central water feed

LW 1503 is the most demanded wet polisher in the industry. It is a compact, but powerful work-horse. Due to its light weight and portability, this product has become the "de facto" standard for all WET polishers. The LW 1503 is frequently used to polish surfaces and edges of natural stone (sink holes, counter top edges and other small stone surfaces).

Velcro™ backing pads and diamond resin polishing pads are to be purchased separately.

Specifications	LW 1503
Max. disc diameter	5"
Speed, without load	. 3,700 RPM
Power input	7.4 AMP
Weight	4.4 lbs

Standard Equipment

1 bail handle	236.934
1 open-ended wrench 17mm	.106.461
1 GFCI operator protection	
circuit breaker in cable	290.521

LW 603 VR - 253.692

Electronic 5" Variable Speed WET Polisher

The most cost-effective and sophisticated WET polisher. Infinitely adjustable polishing speeds (1,000-2,800 RPM) make this product ideal for very sensitive materials and offers users maximum flexibility. The LW 603 VR is a two-handed tool and is commonly used as a large surface polisher. Velcro™ backing pads and diamond resin polishing pads are to be purchased separately.

Specifications	LW 603 VR
Max. disc diameter	5"
Speed, without load 1,00	00-2,800 RPM
Power input	13 AMP
Weight	7.5 lbs

Standard Equipment	
1 bail handle	251.587
1 open-ended wrench 17mm	.106.461
1 GFCI operator protection	

circuit breaker in cable259.990

LW 1202 S - 278.483

The FLEX WET stone polisher with FLEX metal composite housing and GFCI circuit breaker

The 13 AMP wet grinder for more flexibility under mobile conditions. The GFCI operator protection circuit breaker integrated into the power cord allows the two-handed grinder to be operated independently from an isolation transformer. Caution: For safety reasons, this unit should be operated only in conjunction with the GFCI operator protection circuit breaker!

Specifications	LW 1202 S
Max. disc diameter	5"
Speed, without load	1,750 RPM
Power input	13 AMP
Weight	10.5 lbs

Standard Equipment

1 bail handle	258.54
1 open-ended wrench 17 mm	.106.46
1 GFCI operator protection	
circuit breaker in cable	259.99

LW 1509 - 288.896

This FLEX WET grinder is a true powerhouse

This compact 4-1/2" high speed WET grinder is designed for maximum material removal of concrete or natural stone. With its 8,300 RPM and 7.8 AMP motor, it is the fastest WET grinder in the market. It is intended for all heavy duty stone grinding applications (bulk material removal, edge breaking, coarse grinding of uneven surfaces and polish preparation work).

Specifications	LW 1509
Max. disc diameter	4-1/2"
Speed, without load	300 RPM
Power input	7.1 AMP
Weight	4.8 lbs

Standard Equipment

1 bail handle	-
1 open-ended wrench 17mm	
1 GFCI operator protection	
circuit breaker in cable 290.521	
1 splash guard	,

LWW 1506 VR - 255.122

The versatile FLEX edge milling tool for marble and granite

LWW 1506 VR is the "smaller sibling" of the LWW 2106. The LWW 1506 VR is designed to handle up to 1-1/4" thick slabs for milling and grinding sinks, kitchen tops, counters, and tables. For use on both straight and curved edges. Caution: For safety reasons, this unit should be operated only in conjunction with the GFCI operator

protection circuit breaker!

Specifications	LWW 1506 VR
Speed, without load	. 2,200-6,500 RPM
For slab thickness	3/4" - 1 1/4"
Power input	10 AMP
Weight	12-3/4 lbs

Standard Equipment

1 bail handle
1 open-ended wrench 17 mm
1 GFCI operator protection circuit
breaker in cable

LWW 2106 VR - 261.947

The powerful FLEX edge milling tool for granite

LWW 2106 VR is the "heavy duty" two-handed edge milling machine from FLEX. It is designed to handle up to 1-3/4" thick granite slabs. This product is ideally suited to round edges of larger natural stone surfaces (counters tops, tables or double basin kitchen sink holes). LWW 2106 VR is a portable tool yet has the power and flexibility of conventional stationary CNC machines.

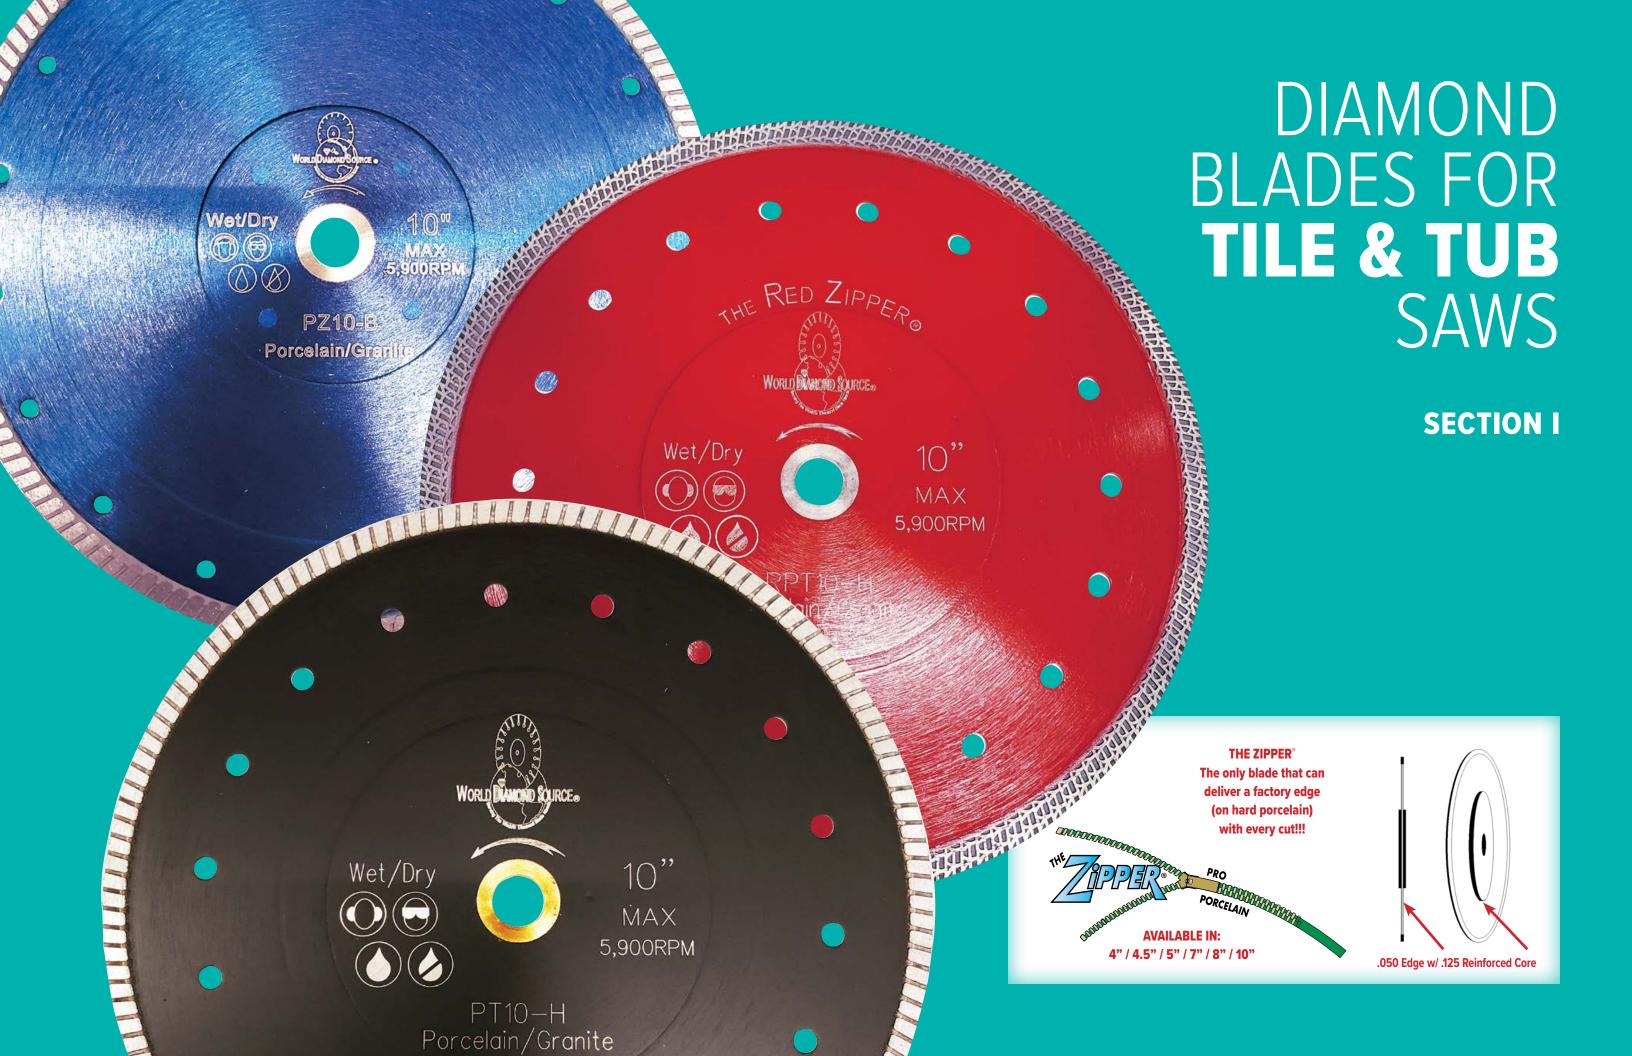

Specifications	LWW 1506 VR
Speed, without load	1,800-5,500 RPM
For slab thickness	3/4" - 1 3/4"
Power input	15 AMP
Weight	22 lbs

Standard Equipment

• •	
1 Open-ended wrench 32 mm 251.4	1 75
1 Open-ended wrench 22 mm 109.3	98
1 Hex wrench 8 x 100 x 130 256.7	42

SPECIALTY TOOLING

OMNIVORE®/METAL

Omnivore® is the first diamond blade that cuts raw metal and steel. In fact, it's the only diamond blade that cuts everything and does it four times faster than a conventional abrasive blade. Outlasts abrasive wheels at least 30 to 1.

- Cuts steel, cast iron, ductile iron, rebar, concrete, 18-26 gauge roof decking, PVC and wood
- · Eliminates downtime changing wheels
- Maintains consistent depth of cut
- Available: 4", 41/2", 5", 6", 7", 8", 9", 10", 12", 14"
